## **Anti-Terror tool comes to Seattle**

Macintosh Business Expo to display device for science and law enforcement

**Seattle, October 29, 2001:** The ProScope is a hand held USB microscope and has created huge interest from Federal and local law enforcement as well as schools and micro-biologists around the world. The ProScope will make it's Seattle debut at the 9<sup>th</sup> annual Macintosh Business Expo on Tuesday October 30<sup>th</sup> at the Washington State Convention and Trade Center from 9am to 5pm.

The ProScope debuted at MacWorld in New York and ever since has been on a whirlwind national tour receiving praise from Mac Addict, Discover, Wired and many online eZines. A recent order from the INS has started a huge interest with federal law enforcement agencies as well as local law enforcement as the Washington State Patrol Crime Lab also uses The ProScope.

Science teachers from k-12 as well as universities remain the number one buyer because The ProScope is a professional level product that can be easily used by a first grader. The bus-powered scope works with both Macintosh and Windows, capturing still or video images with a single click. The ProScope comes with USB Shot 1.0.1 software and a 50X, fixed focus lens. Still images can be saved in a variety of formats and it captures video in QuickTime. Optional accessories include a variety of lenses from a 1X camera lens to 100X and 200X power lenses. For those with an existing microscope or telescope using C-mount lenses, Bodelin sells an inexpensive C-mount adapter so the basic hand-held scope can turn the analog instrument into a digital capture device.

"Seeing microscopic images on a computer screen makes all the difference to me" said a teacher from New Jersey. Another teacher from Milwaukee said "Showing an entire class microscopic images at the same time is very different from having each kid take a turn at looking through a standard microscope. This is a whole new way to teach science".

The ProScope is a product you must see to believe.

### **About Bodelin**

Bodelin is a division of Computer Stores Northwest, one of the largest Apple resellers in the country. The Bodelin division was established to market and distribute The ProScope.
